

CRICKSTATS

Phase 2: Requirement Analysis

Team Lead: A.G. Vasheela Afrin

Team Members: R. Sivasakthi, S. Subha

Platform: Salesforce (Lightning Experience)

1. Functional Requirements

ID	Requirement	Priority
FR-01	Create and maintain Player records (name, role, team, age)	High
FR-02	Record a Match Performance for each player in each match	High
FR-03	Link Match Performance to Player using Master-Detail	High
FR-04	Calculate Total Runs, Total Wickets, Matches Played and Highest Score using roll-up summary fields	High
FR-05	Link Player to Team using a Lookup relationship	Medium
FR-06	Automate follow-up actions with a Record-Triggered Flow	Medium
FR-07	Provide a Lightning App (CRICKSTATS) with tabs for each object	High
FR-08	Provide reports to analyse player and team performance	Medium

2. Non-Functional Requirements

- **Usability:** simple navigation through app tabs
- **Data integrity:** required fields and relationships prevent bad data
- **Accuracy:** totals calculated by the system, not by hand
- **Availability:** runs on Salesforce cloud
- **Security:** access controlled through profiles and permission sets

3. Data Requirements

Object	Purpose	Key Data
Player	Stores each cricketer	Name, role, team, age, career totals
Match Performance	Stores one player's performance in one match	Match, date, opponent, runs, balls, wickets, overs
Team (optional)	Groups players	Team name, city

4. Tools and Technology

Tool	Use
Salesforce Developer Edition	Free org for development
Object Manager	Objects, fields, relationships
App Manager	Lightning App and navigation
Flow Builder	Automation
Reports and Dashboards	Analytics

5. Assumptions and Constraints

- A free Developer Edition org is used, so limits of that edition apply
- Data is entered manually; no live score feed
- Roll-up summary fields require a Master-Detail relationship

6. Acceptance Criteria

- A player can be created and viewed in the app
- Adding Match Performance records updates the player's totals automatically
- The flow runs when a Match Performance record is created
- A report shows player statistics
